PRIDE EMPIRE™

MEDIUM OIL

The Pride™ Empire introduces a new level of backend speed to the MOTIV® line. Featuring the brand-new Propulsion™ Pearl Reactive cover stock, this beast showcases an angular response unlike anything before. Additionally, the asymmetric physics of the Pride™ Empire provides ball drillers with greater layout versatility since weight holes are no longer allowed in competition.

DOMINION™ WEIGHT BLOCK

The Dominion™ asymmetrical core features a moderate primary RG differential and low intermediate to allow the ball to dominate on lower oil volumes and higher friction surfaces.

15# RG: 2.50 | 15# Diff: .042 | 15# Int. Diff: .010 | Flare: 5" +

PROPULSION™ PEARL REACTIVE

The MOTIV® engineering team has been making clear advancements, leading the industry in pearl cover tech in recent years, and this new Propulsion™ system is the pinnacle of angular performance. Utilizing this new pearl cover, the Pride™ Empire pushes through the front of the lane with ease, storing energy for a dynamic move down lane. And that's at a 5000 Grit laser-scanned finish!

5000 GRIT LSP FINISH

We kept the finish at 5000 Grit LSP to tame this beast. Bowlers who desire maximum length and a violent response to friction can adjust the finish to a higher grit like 5500 if desired.
